I think it is more than enough to prepare and get good grades in the exams of the 2022 CBSE Board. The quality of the printing is bad and negates the quality the book deserves. Printing is too small, to save the number of sheets printed, the editor has compressed it too much with very thin sheets (GSM of the sheet is too low) Stripping out the content, everything else is pretty bad. The pages are so tight that opening the book and turning the pages is impossible without ripping the pages. Pages 1-23 cannot be used at all because they are badly damaged.
